## Care Instructions for Ceramic Buttons

Ceramic buttons may be washed while attached to your garment, as long as precautions are taken to avoid breakage and chipping.
In a perfect world they would be removed and sewn back on after cleaning.
But we don't live in a perfect world.
Wrap aluminum foil, bubble wrap, or foam wrap around each button, wash garment inside out.
Hang drying is strongly suggested. Hand washing is ideal.
Putting ceramic buttons in the dryer is akin to taking a ceramic vase and hitting it repeatedly on a metal surface.
As with most ceramic items the glaze will naturally crackle.
This is due to the porous nature of clay.
Clay expands and contracts with the weather and humidity.
